Synty prefab counts

Iron Citadel, set pieces, rooms and Horror Mansion. 2026-10-16.

Method: every prefab and scene is expanded recursively down to the Synty prefabs it places. Counts are placed prefab instances, not meshes. All references resolved; nothing is placed as a loose mesh or FBX.

Summary

	Placements	Unique Synty prefabs	Unique, material variants extra
1) Iron Citadel scene (IronCitadelV2.unity)	5,817	499	499
2) All Synty set pieces (2,330 files)	12,340	474	476
3) All rooms (4,258 files)	2,641,104	973	979
4) Horror Mansion scene (IronCitadelV2_HM.unity)	10,736	185	190

By pack (placements / unique prefabs)

	Dungeon	Realms	Dungeon Map	Horror Mansion
1) Citadel scene	4,239 / 255	1,349 / 211	229 / 33	-
2) Set pieces	3,825 / 156	3,310 / 158	463 / 31	4,742 / 129 (131 w/ variants)
3) Rooms	1,798,209 / 379	666,611 / 360	94,108 / 43	82,176 / 191 (197 w/ variants)
4) Mansion scene	-	-	-	10,736 / 185 (190 w/ variants)

Set pieces: 824 Dungeon, 694 Realms, 812 Horror Mansion files. Dungeon Map placements sit inside the Dungeon set pieces. Rooms: 4,150 AllSyntyDungeons (2,558,928 placements, 782 unique) and 108 Horror Mansion (82,176 placements, 191 unique, 197 with variants). Rooms nest the set pieces, so room figures include and re-count their contents.

Material variants: the only material overrides are on six Horror Mansion HK_*_Stone kit pieces (Doorway, Floor, Lid, Pillar, Post, Wall). No Dungeon scene, set piece or room swaps a material.

Total prefabs in each package

Package	Prefab files
Polygon Dungeon	808
Polygon Dungeon Realms	1,128
Polygon Dungeon Map	57
Polygon Horror Mansion	680

Counts are .prefab files in the imported packs. Only Dungeon Map is imported in MacroTileBuilder; the others were counted in the ColdRuns copies. The AssetCorpus index lists fewer (775, 1,101, 57, 667) because it skips some prefabs.

"Our Iron Citadel scene" is taken as the v2 scene and "Horror Mansion scene" as IronCitadelV2_HM.unity; other seed and film scenes are not counted.
